

# BEYOND ORGANISATION

UNLEASH YOUR COLLECTIVE POTENTIAL & BUILD ORGANISATIONAL RESILIENCE

with Dr. Ralf-Eckhard Türke and Dr. Robinson Aschoff

**Do you wish to amplify your impact to this world, both in quality and scale? How do you address challenges that can only be solved collectively?**

As humans, we strive to act and to be effective beyond our individual scope. An individual that can tie its activities to the whole, the higher goals and purpose, rises beyond all limits.

Beyond Organisation is radical gentle way to develop collective capabilities and resilience required for long-term impact. You will a) be empowered to integrate strategic, cultural and digital dimensions in your activities through building transversal value-delivery architecture. And b) learn to use them to master the challenges of our time. Ignite the flow to thrive in your collective endeavour.

11-12  
SEP  
2020

**30** hours effort  
(includes pre- and post-assignment)

**Ralf-Eckhard  
Türke**

**Robinson  
Aschoff**

**In this lab, you learn the art of collective alignment and how to maximize your self-efficacy.**

**After the Lab, you will be able to:**

**1** Develop collective capabilities for aligned value delivery in your team or organisation.

**2** Facilitate the co-creation of collaboration and gain clarity and precision in assigning tasks, competences, etc.

**3** Build Xtreme Value Delivery (XVD) architectures integrating all strategic, cultural and digital organisational dimensions.

**4** Substantially reduce transaction efforts of your team or organisation through elimination of fragmentation.

**5** Coalesce diverse forms of leadership, operating and governance models into high-performing hybrids.

**STRIDE Labs are compact, innovative and highly-practice-oriented 1.5 days co-learning formats by STRIDE**

# WHY

"Architecture is more than a mere record or reflection of who we are. Instead, the fundamental purpose of architecture is a means for creating our culture and ourselves."

- Peter Buchanan -

How are you making a difference to this world today? Are you facing challenges that can only be solved collectively? Do you wish to learn how to unlock collective potential, i.e. enabling people to go beyond their individual frame of reference aligning forces for whatever you aspire in your endeavor or organisation?

Immerse yourself in an experience-based workshop on building individual and collective efficacy, agile transformation capabilities, lean organisation building on a resilient Governance. Learn how to embed those elements into the DNA of your organisation aligning comprehensively to the value delivery that represents the core of its mission.

# HOW

The Immersion into Beyonding.org will be a facilitated co-creative experience, a well-balanced mix between theoretical foundations of co-creating transformation, experienced-based learning e.g. during team meetings as well as the opportunity to develop own solutions. Participants are welcome to bring situations from their individual challenges and applications to elaborate them in the lab.

# LAB FACILITATORS

**Ralf-Eckhard Türke** has a strong drive to promote individual and collective flow and to evolve purpose in collaboration. He has turned his vision of Beyonding.Org into a business. In his research at the University of St. Gallen, he developed a generic notion of Governance which he then applied in private and public sector organisations. As founder of Sustainance, he helps to create the collective focus on purpose and value-creation.

**Robinson Aschoff** is intrigued by the question how coaction can evolve between individuals, on a larger scale in organisations as well as in society as a whole. Robinson has a background in Organisational Psychology, Business Informatics (PhD) and System Theory. Robinson is working at Sustainance and helps organisations to develop adaptive capacities to sustainably prevail in complex and dynamic environments.
